

# Fossil River

PREDATORS VS U.S. MARINES! Fossil fuel has an ageless affinity with dinosaurs. To create oil, dinosaurs died. Now, in this riveting action thriller, the tables are turning! The perfect energy storm is sweeping over the United States: Japans Fukushima nuclear plant meltdown has paralyzed nuclear expansion globally, BPs Gulf of Mexico oil spill has stalled deep water drilling, Arab countries are in turmoil causing doubt about access to future oil, hurricanes hitting the Gulfs oil rigs and refineries have increased due to global warming, and the nations Strategic Oil Supply is riding on empty. As the energy storm intensifies, the nations access to Arab oil, once supplying over sixty percent of our fossil fuel, is being threatened causing citizens to panic for lack of gas at the pumps, stranding cars across the country and inciting riots. The United States must find new sources of domestic fossil fuel urgently or face an energy crisis that will plunge the nation into a deep depression, much worse than that of 1929. At the last moment of desperation, the U.S. discovers the worlds largest fossil fuel deposit, in a remote mountain range revealed by glacier thaw within Alaskas Noatak National Preserve surrounding six and a half million acres. Preventing access to the oil is a colony of living fossil dinosaurs that will protect its territory to the death. In preliminary civilian and military scouts, nobody gets out alive; nobody can identify the predator--until Dr. Kimberly Fulton, Curator of Paleontology at New Yorks Museum of Natural History, is flown into the nearly-inaccessible area by Scott Chandler, the Marine veteran helicopter pilot whos the Parks Manager of Wildlife. After page after compelling page of non-stop action, all hell breaks loose when Fultons teenage son and his girlfriend vanish into the Park. Will the nations military be jeopardized for lack of mobility

fuel, and will Americans nationwide run out of gas and be stranded, or will the U.S. Marines succeed in penetrating this remote mountain range in northwestern Alaska to restore fossil fuel supplies in time to save the nation from the worst energy catastrophe in recorded history?

PRE-PUBLICATION TESTIMONY ON FOSSIL RIVER: Fossil River is a terrific read. Miller has created a fast-paced, intricate thriller that is a pure adrenalin rush. Be prepared to stay up long into the night with this book.--James Swain/Author of The Night Monster Wow! Michael Crichton move aside. Fossil River is awesome. I could not put it down. I was up all night until I finished it, and it kept me on the edge of my seat and my bed. I think Millers Fossil River will be the next Dan Brown and Michael Crichton of book fiction.--Frank S. Marano, CPA Chairman and CEO, Marano & Distant Associates, LLC Fossil River is a riveting reality check on Americas challenging energy future, and a glue-you-to-your seat roller coaster ride from adventure to terror and back. A scary fast read! You wont be able to put this book down!--Mark Miller Retired Executive Vice President and General Manager of Hearst Magazines Mark Miller In the spirit of Michael Crichton, Jock Miller brings us Fossil River, a paleontological thriller sure to please . This tasty bit of fantasy science centered in a national park under siege, brings us living dinosaurs, smart attractive women, environmental messages, and enough action and suspense to make it perfect for a long plane ride.--Dr. Mark A. Norell, Chairman and Curator Division of Paleontology, American Museum of Natural History VISIT THE SITE!
